Problems on the site

- No elevators for people with wheel chairs
- No slopes for bikers
- Inefficient use of public space
- The issue of public lights
- Feeling of security
- Lack of access to Danube
- Traffic jams

The focus of the project

- We have decided to concentrate on the site at Boráros tér
- Our focus is to tackle the more efficient usage of public space

Why the issue of public spaces?

Lots of people passing by

Easy accessibility

Lots of free space

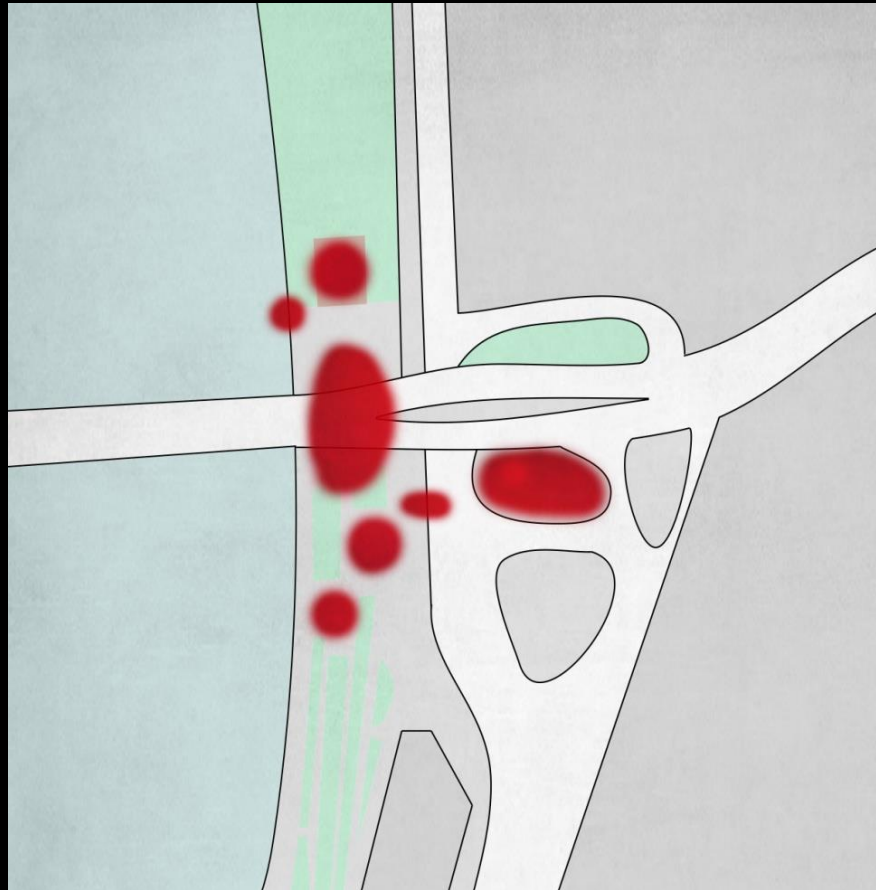

Great view on the city

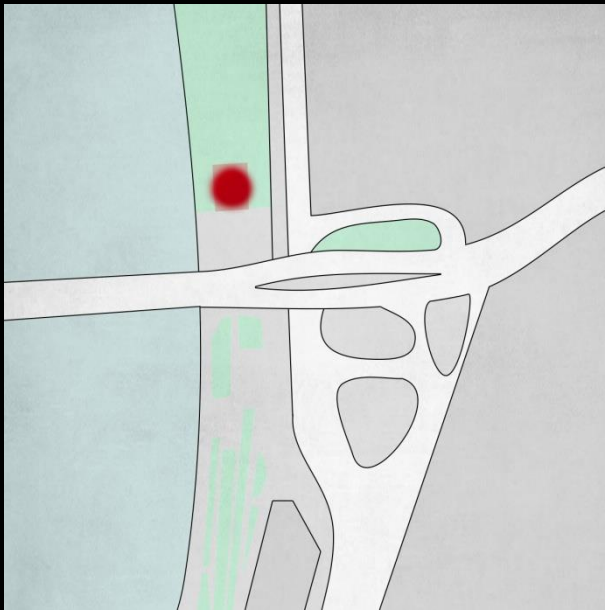

Inefficient utilization of already existing basic infrastructure

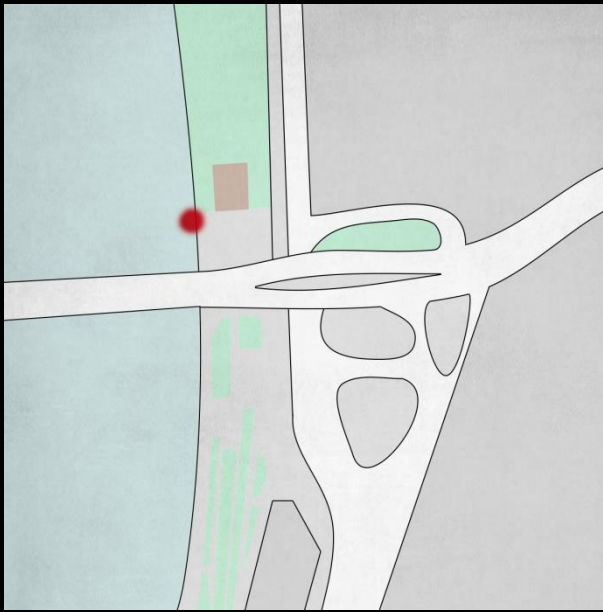

Place of social integrity

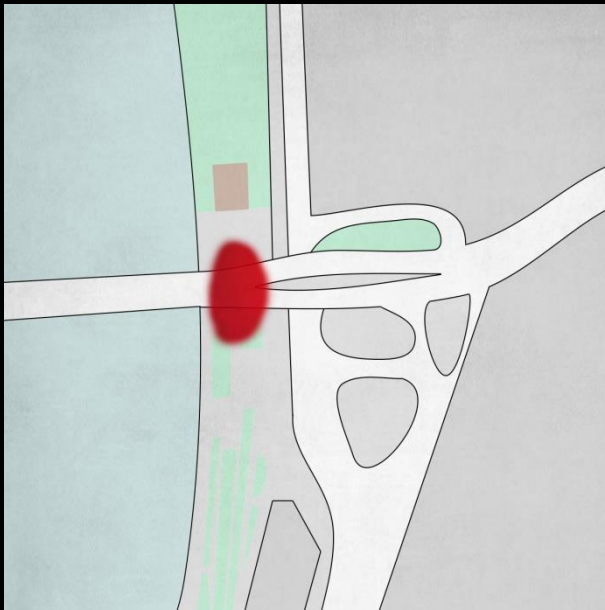

Big results in a short period of time with low investments

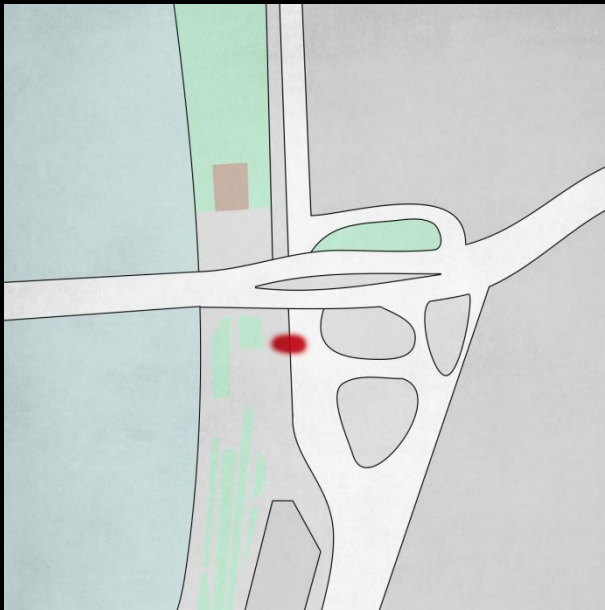

The map of problems

The needs of users

Needs of the family

- Safe playground for the children
- Well maintained parks for outside activities

Needs of students

- Meeting point
- Open-air activities

Needs of tourists

- Attractive place with a great view

Needs of daily commuters

- Higher quality time spending while waiting for means of transportation
- Budget cafeterias, restaurants
- Opportunities to increase the level of social cohesion

Our solutions

Proposed solutions for the area under the bridge

Contemporary art projections on the wall of the bridge

Mobile „box” bar

Place for street art and street performs

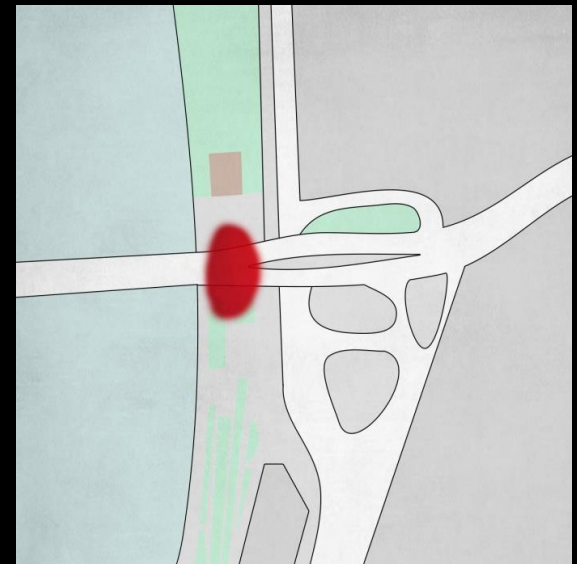

Public seats and hammocks

Green surrounding area

Light shows on the bridge ceiling

Open-air parties

Exhibitions

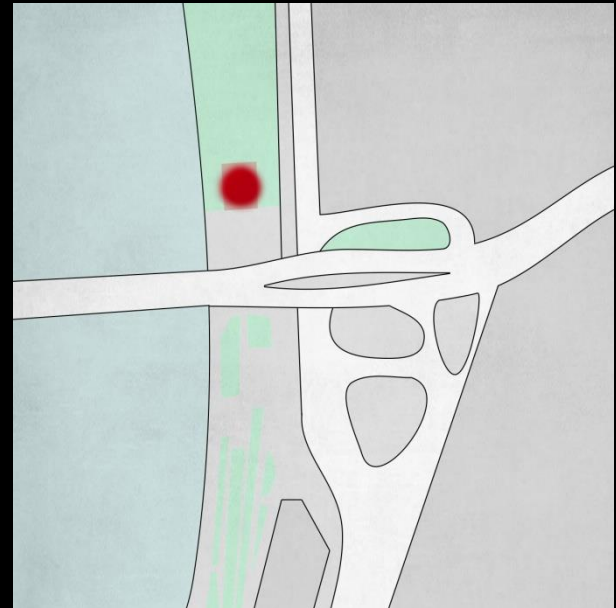

Proposed solutions for the park

More attractive park

Replace the fences of the playground with a fence made of natural material

More lights for increasing the feeling of safety

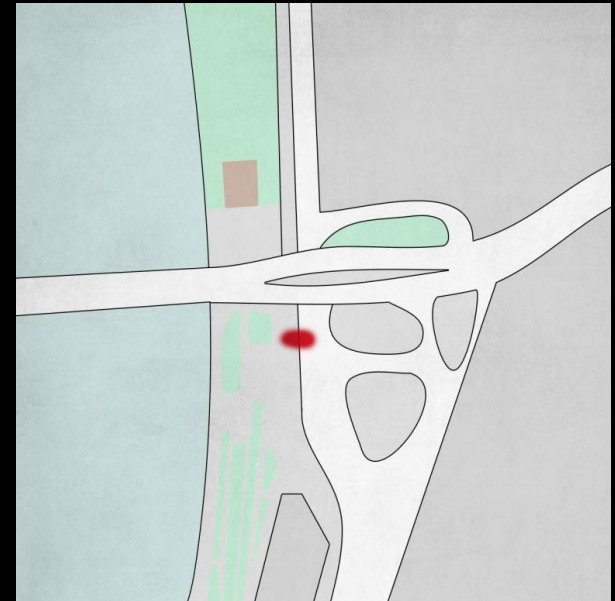

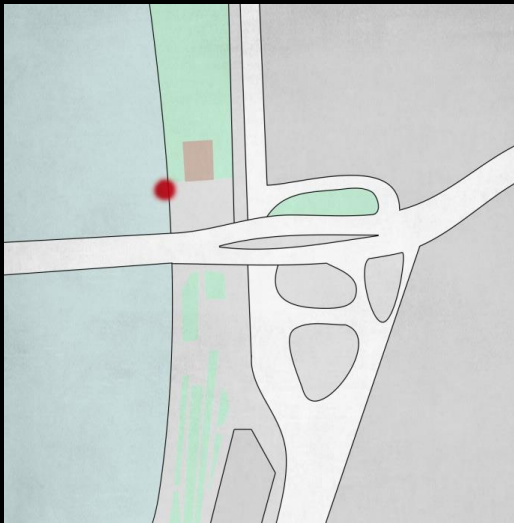

Put the lights on the trees

Proposed solutions for the tunnel and the boat stop

- Wall paintings in the tunnel
- Tribune with a river view

Overview of the core of our project

Thank you for your attention!
